Start focusing on
your business
not on your
servers

Count on us for all your needs

You can rely on us to solve your server management problems because we have the tools you need. Whenever you need help, we're here 24/7. Here are some of the most common requests we resolve:

Restoration after a disaster

If something occurs wrong, we will assist you in restoring your server completely or partially.

Troubleshooting Cloud Servers

Cloud Server Maintenance is what we specialize in, and we'll help you set up services and resolve errors on your cloud servers (AWS, Google Cloud, Azure, etc.).

Optimization of database

Our team of database experts will audit your database settings to identify performance bottlenecks and optimize.

RAID recovery corrupted

If you have a corrupted RAID set up, we will rebuild it.

Patching & Software Updates

We will install pending software updates and apply security patches periodically.

Repairing infected websites

If there is no backup, we will restore a clean backup or manually clean the site.

Optimization of services

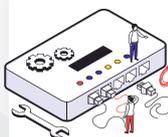

Our team will regularly optimize your database, apps, and servers to ensure super fast performance.

Removal of IP from blacklists

We'll delist your IP address and patch the vulnerability that caused it to be blacklisted.

Hardening of security systems

We will tighten security settings and install security software to keep your servers safe.

Fixing a database

Whenever your data is lost, or backed up, Codeyo Genie server administrators will retrieve it for you.

Here to provide 99.99% uptime.

Setup & Restoration of Backups

Our service includes restoring data from backups and configuring backups.

Bruteforce mitigation

For your apps' protection, we will block anyone trying to bruteforce your server.

Audits of security

We will audit your servers periodically and fix any vulnerabilities we find.

Resolve email errors

We will fix any problems with business mail, marketing lists, or other mails.

Management of disk space

Disk space issues are prevented by regularly auditing disk space, deleting junk files, and expanding the available

Monitoring & recovery of websites

Your server is in safe hands with CodeyoGenie performance monitoring & affordable server optimization.

Take advantage of CodeyoGenie Server and Support today and start saving money Focus on your business rather than server maintenance. Our team of professionals takes care of your server 24/7/365 once you give it to us.
